4-year Unlimited Mileage Roadside Assistance Program

1-Check for a list of BMW-tested mobile phones at your authorized BMW Center or [bmwusa.com/bluetooth](https://www.bmwusa.com/bluetooth).

2-Cruise control is not a substitute for the driver's own responsibility in adjusting speed and otherwise controlling the vehicle. After evaluating the road, traffic and visibility conditions, the driver must decide whether and how the system is to be used.

3-BMW i vehicles come equipped with a Mobility Kit and are not equipped with a spare wheel or tire. Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires.

4-Active Driving Assistant and Active Driving Assistant Professional are not substitutes for the driver's own responsibility in maintaining safe control of the vehicle. Lane Departure Warning requires clearly definable lane markings that are not obscured by rain, snow, etc.
