

G-POWER M6 with individual interior design from the G-POWER Manufactory - One of the fastest automobile interiors in the world

Since G-POWER has already created the world's fastest sedan (M5 HURRICANE RR), the world's fastest LPG-powered car (M5 HURRICANE GS), the world's fastest estate car (M5 HURRICANE RS Touring), the world's fastest 4-seated Coupé (M6 HURRICANE RR), the world's fastest BMW M3 (M3 RS) and one of the fastest BMW 1 M Coupés (G1 V8 HURRICANE RS), it is generally known that G-POWER is capable of building powerful cars.

But G-POWER does not only set benchmarks in performance, but also when it comes to individuality and exclusivity. Therefore the G-POWER Manufactory has been established. Its function is to solely hand build the individual configured complete vehicles for an exquisite clientele.

G-POWER individual interior design for the BMW M6 in Iceland grey

Vehicle interior refinement according to customer requests

Original BMW seat cushions are reshaped

Interior features can be upgraded with individual Entertainment, Infotainment and Business Packages

High fitting accuracy thanks to hand made interiors

Excellent product quality due to the use of materials and natural products according to highest quality standards

The company philosophy of the G-POWER Manufactory is the entire revision of the individual basic engines with the clear objective to produce the strongest and fastest BMW M model in the world just like the 100% customer dedication concerning the features of the vehicle's interior. The latest masterpiece and an impressive example for the exceptional performance of the G-POWER Manufactory is the completely reworked interior of a G-POWER M6 Coupé in Iceland grey, in which almost every part of the interior has been refined.

The interior of the BMW M6 upholstered by G-POWER in premium Kjerba Nappa leather and Alcantara offers impressive confirmation of what is possible above and beyond "BMW Individual" equipment. The painstaking works carried out by hand by G-POWER craftsmen go far beyond simply upholstering virtually every surface with the finest grades of Kjerba Nappa leather and Alcantara. In contrast to many leather workshops, G-POWER takes the time to reshape the original BMW seat cushions. Only thanks to this unique technology can the distinctive look created by G-POWER be achieved in combination with an optimum synthesis of comfort and lateral grip.

The visual highlight of the G-POWER full leather upholstery created for this G-POWER M6 is the well-balanced material mix of Kjerba Nappa leather, Alcantara and Carbon applications. Stitching on the surfaces of the front seats, rear seats and the door panels are perfectly finished and document the exceptional craftsmanship of the G-POWER interior specialists. G-POWER logos integrated into the seats set tasteful accents in the sophisticated composition of the very finest materials all colored in Iceland grey. Next to the refinement of the interior itself, the customer has the option to upgrade the vehicle features, as well. For this purpose G-POWER offers individual Entertainment, Infotainment and

Business Packages that can be customized according to the customer's needs. From "mobile office" to "private lounge" including an espresso machine; the sky is the limit. In order to proof the G-POWER tachometer with a scale to 400 km/h, matching the interior's grey color, necessary the G-POWER M6 has been equipped with the legendary G-POWER M6.

SK III RS twin supercharger system. The supercharged 5.0l V10 engine, featuring two ASA superchargers, has a peak output of 750 hp and accelerates the BMW M6 Coupé to a top speed of more than 360 km/h. Thus the G-POWER interior is one of the fastest in the world. The cost of the G-POWER individual interior design is strongly related to the wishes expressed by the customer and therefor can only be quoted directly from G-POWER.
