

# Part 573 Safety Recall Report

# 23E-090

**Manufacturer Name :** Chrysler (FCA US, LLC)

**Submission Date :** NOV 22, 2023

**NHTSA Recall No. :** 23E-090

**Manufacturer Recall No. :** C1A

## Manufacturer Information :

**Manufacturer Name :** Chrysler (FCA US, LLC)

**Address :** 800 Chrysler Drive  
CIMS 482-00-91 Auburn Hills MI  
48326-2757

**Company phone :** 1-800-853-1403

## Population :

**Number of potentially involved :** 5

**Estimated percentage with defect :** 1 %

## Equipment Information :

**Brand / Trade 1 :** MOPAR

**Model :** Hybrid Service Kit - Battery pack, 400V

**Part No. :** 68488244AA

**Size :** NR

**Function :** NR

**Descriptive Information :** Some high voltage ("HV") batteries may fail internally.

The defect has not been identified and the root cause is still being investigated.

The suspect part population includes HV batteries built July 26, 2021, through March 15, 2022, and was determined using supplier manufacturing records.

Similar HV batteries not included in this recall were manufactured before or after the suspect period.

**Production Dates :** JUL 26, 2021 - MAR 15, 2022

## Description of Defect :

**Description of the Defect :** If installed in a vehicle, an internally failed HV battery could lead to a vehicle fire with the ignition on or off.

**FMVSS 1 :** NR

**FMVSS 2 :** NR

**Description of the Safety Risk :** A vehicle fire can result in increased risk of occupant injury and/or injury to persons outside the vehicle, as well as property damage.

Description of the Cause : NR

Identification of Any Warning None  
that can Occur :

## Involved Components :

Component Name : Hybrid Service Kit

Component Description : Battery pack, 400V

Component Part Number : 68488244AA

## Supplier Identification :

### Component Manufacturer

Name : SAMSUNG SDI AMERICA INC

Address : 4121 N ATLANTIC BLVD  
AUBURN HILLS Michigan 48326-1570

Country : United States

## Chronology :

- On May 12, 2023, the FCA US LLC ("FCA US") Technical Safety and Regulatory Compliance ("TSRC") organization opened an investigation after receiving two field reports of 2021 MY Jeep Wrangler PHEVs with fires originating from the HV battery.
- In May 2023, FCA US requested buybacks of both vehicles for further analysis.
- From May 2023, to September 2023, FCA US received five additional reports of 2021-2022 MY Jeep Wrangler PHEVs with fires originating from the HV battery and requested buybacks of these vehicles for further analysis.
- In October 2023, FCA US received two vehicle buybacks and have disassembled the HV battery packs. The modules and cells are undergoing additional analysis.
- As of November 9, 2023, FCA US is aware of zero customer assistance records, zero warranty claims, and eight field reports potentially relating to this issue for all markets with dates of receipt ranging from April 6, 2023, to November 2, 2023.
- As of November 9, 2023, FCA US is not aware of any accidents or injuries potentially relating to this issue for all markets.

• On November 16, 2023, FCA US determined, through the Vehicle Regulations Committee, to conduct a voluntary safety recall of the affected units.

## Description of Remedy :

Description of Remedy Program : FCA US will conduct a voluntary safety recall on all affected parts to repurchase the HV battery.

FCA US has a longstanding policy and practice of reimbursing owners who have incurred the cost of repairing a problem that subsequently becomes the subject of a field action. To ensure consistency, FCA US, as part of the owner letter, will request that customers send the original receipt and/or other adequate proof of payment to the company for confirmation of the expense.

How Remedy Component Differs from Recalled Component : Remedy will be to repurchase the HV battery.

Identify How/When Recall Condition was Corrected in Production : NR

## Recall Schedule :

Description of Recall Schedule : \*\*11/22/2023: FCA US will notify dealers and begin notifying owners on or about 01/11/2024.

Planned Dealer Notification Date : JAN 11, 2024 - JAN 11, 2024

Planned Owner Notification Date : JAN 11, 2024 - JAN 11, 2024

## Purchaser Information :

The following manufacturers purchased this defective/noncompliant equipment for possible use or installation in new motor vehicles or new items of motor vehicle equipment:

Name : NR

Address : NR

NR

Country : NR

Company Phone : NR

\* NR - Not Reported

Estimated percentage with defect : 1 %

**Vehicle Information :**

Vehicle 1 : 2021-2023 Jeep Wrangler

Vehicle Type :

Body Style : SUV

Power Train : NR

**Descriptive Information :** Some 2021-2023 MY Jeep Wrangler Plug-In Hybrid Electric Vehicles ("PHEVs") may have a high voltage ("HV") battery which may fail internally. The defect has not been identified and the root cause is still being investigated.

The suspect period began on September 18, 2020, when production of Jeep Wrangler PHEVs with battery cells manufactured from January 21, 2021, through October 2, 2021 began, and ended on March 22, 2023, when production of vehicles built with battery cells manufactured from January 21, 2021, through October 2, 2021 ended. The suspect population was determined using supplier manufacturing records of HV batteries with cells manufactured from January 21, 2021, through October 2, 2021.

Similar vehicles not included in this recall are not PHEVs, or PHEVs built with cells manufactured outside of the suspect range.

Production Dates : SEP 18, 2020 - MAR 22, 2023

- On November 16, 2023, FCA US determined, through the Vehicle Regulations Committee, to conduct a voluntary safety recall of the affected vehicles.

## Description of Remedy :

Description of Remedy Program : FCA US will conduct a voluntary safety recall on all affected vehicles. Remedy will be a software flash on the HV battery pack and if a DTC sets, the pack will be replaced. Customers are advised to refrain from recharging these vehicles and not to park them inside of buildings or structures, or near other vehicles until the vehicle has the final repair completed.

FCA US has a longstanding policy and practice of reimbursing owners who have incurred the cost of repairing a problem that subsequently becomes the subject of a field action. To ensure consistency, FCA US, as part of the owner letter, will request that customers send the original receipt and/or other adequate proof of payment to the company for confirmation of the expense.

How Remedy Component Differs from Recalled Component : Remedy will be a software flash and replacement of the HV battery pack if needed.

## Statement: PHEV Fire Risk

**November 22, 2023 , Auburn Hills, Mich.** - Stellantis is recalling an estimated 32,125 U.S.-market plug-in hybrid SUVs to resolve a potential fire risk.

A routine Company review of customer data led to an internal investigation that discovered eight vehicle fires. All were parked and turned off, while six were connected to chargers.

**Stellantis is unaware of any related injuries or accidents.**

This recall affects certain model-year 2021-2024 Jeep® Wrangler 4xe SUVs. No other Wrangler models are affected.

**The vehicles may be driven. However, the Company is advising owners to refrain from recharging these hybrid vehicles, and to park them away from structures and other vehicles, until they are remedied.**

The remedy involves a software flash. If a certain error code is observed, the battery pack will be replaced.

Affected customers will be advised when they may schedule service. The Company estimates one percent of affected vehicles may have the defect.
