27 November 2023

Make

LAMBORGHINI

Model

Huracan

Variants

Huracan EVO, Huracan STO, Huracan Tecnica

Year range

2022 - 2023

Affected units

77

Images

Identifying features

VIN (Vehicle identification number)

 [REC-005834-VIN-List-1.csv \(CSV, 1.46 KB\)](#)

What are the defects?

Due to an incorrect software configuration, the driver's seat belt reminder chime and visual indicator will not activate as intended below 20 km/h. This may result in the driver not being reminded to ensure their seat belt is buckled when operating the vehicle below the speed of 20 km/h. The correct system functionality is always guaranteed above this speed.

What are the hazards?

In the event of an accident if the driver's seat belt is not securely buckled the occupant may not receive the full protection of the seatbelt system. This could increase the risk of injury to vehicle occupants.

What should consumers do?

Owners of affected vehicle can contact their authorised Lamborghini dealer for an appointment to update the software, free of charge.

Supplier details

Automobili Lamborghini S.P.A.

Who should owners/operators contact for more information?

Contact name

Customer Care Lamborghini
