

**NOVITEC** **ROSSO**

**FF**

NOVITEC ROSSO specialise in highly developed and precise engine modifications, as well as the highest quality products adopting optimal technical efficiency and avant garde styling. At Novitec you can expect a bespoke programme for you and your car as part of the excellent service we pride ourselves on offering.

The success story that is NOVITEC Automobile GmbH began in 1989 from the vision of Stuttgart based Wolfgang Hagedorn. With foresight and creativity, he rapidly elevated Novitec to one of the most prosperous and respected companies in the sector.

The new sophisticated NOVITEC program for the FF does include amongst others, aerodynamically efficient carbon-fiber bodywork components, ultra-light forged wheels, high-performance exhaust systems and more.

**Our extensive program:**

**NOVITEC PERFORMANCE TUNING**

The in-house developed performance gains are the heart of the **NOVITEC** program. Massive power development and outstanding performance, coupled with a unique sports car modified for daily use, are the crucial factors that will convince you of the performance delivered, built and designed by **NOVITEC**.

## NOVITEC POWER Stage 1

Consisting of a new adjusted engine electronic with modified group of curves and a higher cut-off speed to 8.200 rpm (thereby a higher V-max), stainless-steel exhaust system without flap-regulation including NOVITEC tailpipes as well as catalyst-replacement-pipes and exhaust replacement pipe X-Pipe System  
weight-reduction: 16 kg

Article No.: F1 777 03

Optional exhaust system with flap-regulation and switching of the exhaust-flaps at the Manettino in the steering wheel

Article No.: F1 777 KL

<b>performance:</b>	516 kW (702 hp) at 8.200 rpm
<b>max. torque:</b>	714 Nm / 6.200 rpm
<b>Vmax:</b>	+ 5 km/h

### NOVITEC POWER Stage 2

Consisting of a new adjusted engine electronic with modified group of curves and a higher cut-off speed to 8.200 rpm (thereby a higher V-max), stainless-steel exhaust system without flap-regulation including NOVITEC tailpipes as well as sport metal catalysts (100 Zeller) with reduced exhaust back pressure exhaust replacement pipe X-Pipe System

weight-reduction: 13 kg

Article No.: F1 777 04

Optional exhaust system with flap-regulation and switching of the exhaust-flaps at the Manettino in the steering wheel

Article No.: F1 777 KL

**performance:** 510 kW (694 hp)  
8.200 rpm

**max. torque:** 708 Nm / 6.100 rpm

**Vmax:** + 5 km/h

### NOVITEC POWER Stage 3

Consisting of a new adjusted engine electronic with modified group of curves and a higher cut-off speed to 8.200 rpm (thereby a higher V-max), stainless-steel exhaust system without flap-regulation including NOVITEC tailpipes

weight-reduction: 9 kg

Article No.: F1 777 05

Optional exhaust system with flap-regulation and switching of the exhaust-flaps at the Manettino in the steering wheel

Article No.: F1 777 KL

**performance:** 506 kW (688 hp)  
at 8.200 rpm

**max. torque:** 701 Nm / 6.100 rpm

**Vmax:** + 5 km/h

## NOVITEC power optimized ECU's

Consisting of a new adjusted engine electronic with modified group of curves and a higher cut-off speed to 8.200 rpm (thereby a higher V-max) and switching of the exhaust-flaps at the Manettino in the steering wheel

Article No.: F1 777 08

**performance:** 503kW (684 hp)  
8.200 rpm  
**max. torque:** 696 Nm / 6.150 rpm  
**Vmax:** + 5 km/h

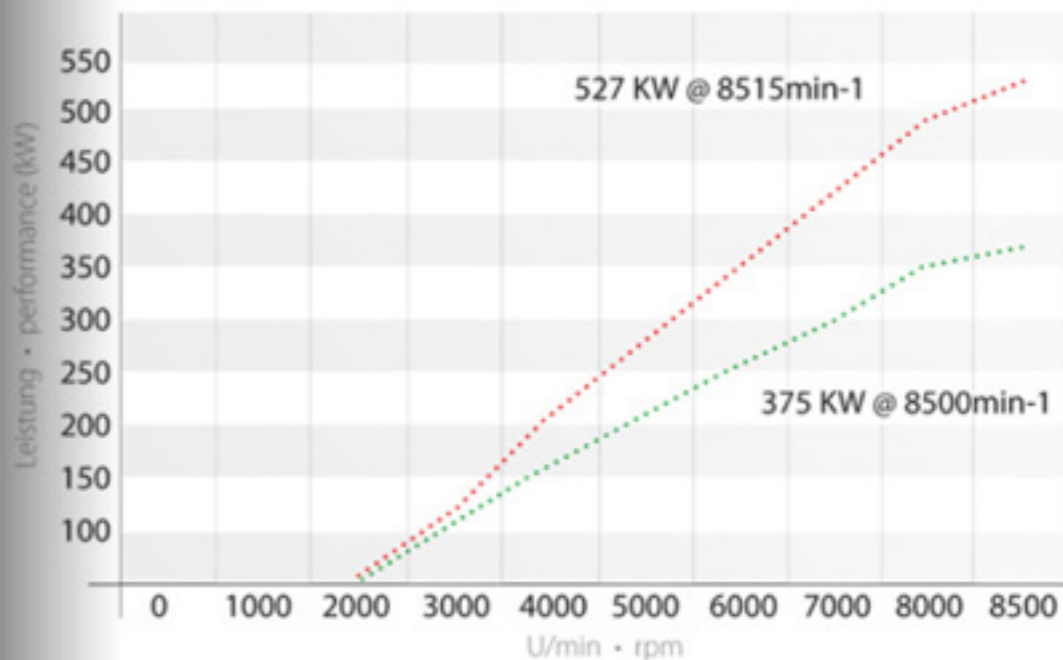

ENGINE | NOVITEC RACE Bi-compressor

The heart of the Novitec Rosso program is the development of performance engines. The various engine performance kits are a product of extensive research and development. These performance kits enjoy a very good reputation thanks to their power output, driving performance and durability. The installations are performed and completed by skilled NOVITEC technicians either at the Novitec headquarters in Germany or as a local installation worldwide through our worldwide service program.

- ..... Novitec Rosso F430 Scuderia Bi-Kompressor

**NOVITEC wheel and tire combinations** are the perfect application for maximum contact with the road. The wheel and tire sizes are matched directly to each vehicle so there is never the need for any adjustment to the original vehicle set up and programming. The design of each wheel fits perfectly and uses the factory tire pressure monitors and center caps. **NOVITEC** wheels are made exclusively for Ferrari and Maserati only.

Carbon-coating for rim-flange  
Article No. F4 777 CA

Shape and design of the individual aerodynamic components are based on extensive wind tunnel testing to achieve the optimal aerodynamic form and function. In the development of these components, there is also a lot of emphasis placed on the aesthetics of the individual parts so that the visual design accents do not drastically change the fundamentals of the vehicle.

## AERODYNAMIC TESTING | Wind Tunnel

Finding a design that not only enhances the aesthetics of the vehicle, but optimizes the aerodynamic function as well, are the two main goals of the construction of our body parts. The Novitec Rosso aerodynamic program accomplishes these goals in the wind tunnel of the Research Institute for Motor Vehicles in Stuttgart. In this special facility, the driving behavior of the vehicles can be reproduced at different velocities. The tests are performed by a simulated velocity of 140km/h. Each part of the Novitec Rosso aerodynamic program has been tested not only piece by piece, but also in conjunction with each part that we produce to maximize aerodynamic performance. The lift caused by an increase in velocity can be reduced by accurately calculated and developed Novitec Rosso aerodynamic parts. This design and research deliver optimal driving stability and performance at the highest velocities.

NOVITEC exhaust systems are characterized by using the highest quality materials, a perfect fit and powerful sound characteristic. They are available as individual performance optimizing components with our without flap regulation. The custom tailored tailpipes give the rear end of your vehicle a more aggressive and finished appearance.

**NOVITEC suspension** and chassis technology offers many different possibilities. The engineers have thought of you and your needs in every way. We offer everything from a spring kit to reduce the height of the vehicle, a complete suspension system that is fully adjustable with detailed specifications and parameters or a hydraulic system to raise the front axle by 40mm at the touch of a button from inside the cockpit. Your driving comfort and performance are at the forefront of our development.

SPECIAL EDITION | Individual Vehicles

Having a special paint color or multiple colors in mind for your vehicle or a complete redesign of the interior with fine and unusual materials is no longer out of reach. Over and above our standard product line is our individual program where we let your wildest dreams and desires become a reality. Once you have your vision our team will get to work on producing a personalized masterpiece for you.

Driver Watch | ANONIMO Militare Automatico  
-Sold Out-

The **ANONIMO Militare Automatico** with Sapphire Crystal is available as an exclusive **NOVITEC ROSSO** edition. The watch, 43.40mm in diameter, has two patents. The first is the calfskin wrist strap which is treated with the Kodiak technique, this allows the extended immersion of the strap in both fresh and salt water. The second is the unique crown vanishing locking device (integrated with the watch strap) with a protected crown positioned at 6. This innovative locking crown with excellent comfort while wearing, give the Militare Automatico its distinctive advantage.

Driver Watch | ANONIMO Militare Automatico II

The success and great popularity of the first edition **NOVITEC ROSSO** timepiece gives us the opportunity to once again offer a true work of art that can be worn and enjoyed day after day. The second edition is a truly distinctive timepiece with a diameter of 43.40mm, a patented locking system of the crown at the "6" and a sapphire crystal back, make this a timeless masterpiece for a select few.

Like its predecessor, the **Anonimo Militare Automatico II Edition NOVITEC ROSSO** will be a limited edition timepiece with 88 examples produced and offered.

NOVITEC ROSSO | Vintage-Champagne

The **NOVITEC Champagne** originates from the small village of Mailly-Champagne. The vineyards of this small village in the heart of the Champagne region are certified 100% Grand Cru. Jean-Pierre Seconde has specialized in the production of the finest Champagne since 1970.

**R.M., Récoltants – Manipulants"**

**NOVITEC Champagne** has received the blessing and is allowed on the label with the exclusive marking **R.M. "Récoltants – Manipulants"**, confirming that that the Champagne is produced with the finest grapes from the vineyards of Jean-Pierre Seconde. These grapes are used without exception for the complete production of the **NOVITEC Champagne**.

The production of **NOVITEC Vintage Champagne** is made from 50% Pinot Noir and 50% Chardonnay grapes. The harvest of these fine grapes is finished by hand and pressed at the company owned wine press. The result and taste of **NOVITEC Vintage Champagne** is formidable thanks to its select flavours and elegance.

NOVITEC ROSSO | Driver Shirt

Slim Line with trendy print and glimmer-effect. Made of high-refined Cotton with Spandex. Available in S / M / L / XL in standard length and especially for taller people we have L / XL as 5 cm longer version.

NOVITEC ROSSO | Tire Pillow

We have, new in program, the ultimate protection for your tires for longer time in stock. The high-tech material of the PE-foam-pillow saves your valuable tires and avoids the development of flat - tires which might cause an unquiet drive or even a damage of the tires. After placing the car on the pillows, the material adapts exactly the form of the tires and provides the optimal seating. Once they are not used anymore, the pillows reform after some days in its initial form and can be used again for the same or even a different vehicle.
