Seats:	2	Previous owners (excl. current):	9
Service History Available:	Partial	Fuel:	Petrol
Body Type:	Coupe	Metallic Paint:	Yes
Drivetrain:	2 WD	Exterior:	Alloy Wheels, Rear Spoiler, Tuning

This is not an easy decision at all but unfortunately I am having to sale my one off RX7 up for sale due to unseen circumstances

We're do I start I will list everything I know of top of my head

I bought this as a standard car but with the sr20det engine and the inside already stripped out but since owning it I have spent a small fortune on it completely changing the appearance inside and out

Mot 21/07/2022

This car is an import Millage on the car is 142732 millage on engine I don't think is huge but again I can't prove this

## ENGINE

I don't have hardly any paperwork on the engine also can't prove the bhp unfortunately due to the previous owner not having any but he send a description of the build also Unfortunately not a rotary ☹️ I can totally understand this will put a lot of people off but I can only go of what I have been told . The car still has the all the wiring for the rx7 engine so could be converted back to rotary if wanted

sr20det Engine fully forged  
hks cams 264,  
tornei rocker arm stoppers,  
adjustable cam pulley,  
vvt removed,  
apexi head gasket,  
has lighter water pump pulley,  
mapped up to 480bhp at 1.5 bar ideally would benefit from a link ecu and another map  
Turbo setup is Garrett td06 on mid mount mani with external waste gate and screamer,  
braided turbo lines etc.  
3" full exhaust system blitz nr spec .  
Apex induction kit .  
Big front mount intercooler,  
oil cooler,  
alloy radiator,  
clutch which is 3 puk exedy,

bigger fuel pump AEM 340 high pressure . z32 afm, ecu chipped and mapped by horsham .  
New starter motor  
New alternator  
Just had service opie oils Titan race pro & filter

#### SUSPENSION RUNNING GEAR

Twin adjustable coilovers  
Welded rear diff  
Short shifter  
Rx7 original upgrade front callipers  
Skyline rear callipers

#### INTERIOR

The car is completely stripped out with a half role cage and harness bar -  
Kevlar bride seats reps I believe -  
flocked dash with custom clock surround to fit dash  
race2 dash  
short shifter  
big E break  
snap of steering wheel  
boost controller  
battery motamec tray relocated behind seat  
fire extinguisher .  
Custom door card  
I also have other gauges that have not been fitted yet

#### EXTERIOR

Full one of James dean  
SPEC X-1 JD EDITION kit -  
Full custom purple haze mega shift paint job  
Driftworks Work emotion  
T7R 2P custom wheels  
Rear 18x12 0J ET - 32  
Front 18x10 0J ET - 10  
Carbon hood  
R-magic headlights  
Driftworks country labs high level spoiler  
Driftworks sunstrip  
The car looks pretty solid on the underside

The car really is something else and as far as I am aware not another in the uk with this kit .

There is a few things that need finishing  
Headlights not working  
Dash needs to be finished (I have all the buttons and wheels speed sensor ) needs wiring in  
Gauges need wiring up if you want to fit them  
The car has been mapped but ideally to get the full benefit of the engine a link ecu and a map map would be good  
Will soon need break pads  
There is holes in the boot were the existing spoiler was but have carbon patches over them  
Will need a windscreen at some point as cracked on passenger side

I have tried to be as honest as I can about the car but please keep in mind this is not a new car and is highly modified so when buying this car it will be sold as seen with no come backs viewing is welcome on appointment & I am  
Not sure what to value it at considering the prices of Re7,s and how much work has gone into this and yes I know it's not a rotary and yes I know it's not original lol

Please message me and I will do my best to help

The car will be sold as seen no returns due the the car being highly modified

I am no rush whatsoever to sale but if someone comes up with the money then I will let it go

I have loads more pics if needed

Please don't wast my time else your be ignored

May px / swap
