

FIRST EDITION

PRICE LIST & SPECIFICATIONS

Photo / mblife.co.za / Lisa Johnston

the pod-idlada is a sustainable, modular, prefabricated nano-home designed in South Africa.

PREFABRICATED

each pod is prefabricated off-site to each client's specification, allowing you to simply order a bare-bone shell or to go for a fully kitted deluxe interior.

MODULAR

several 17m² units can be positioned in various configurations to form larger, multi-use, living areas.

SUSTAINABILITY

pre-fabrication ensures quality, lower labour costs, added productivity and reduces material waste to just 2%.

SOUTH AFRICAN

designed and manufactured in South Africa

POD / 17m²

each space is designed to have a dual use; spaces are not named as conventional rooms; the owner is free to change the use of these areas as needed. sleeps two comfortably in the mezzanine area. the downstairs task area can accommodate an occasional guest and doubles as an office / laundry / storage area.

Sustainability

the module is fitted with energy saving devices appropriate to it's size and location. specific advice is given for each pod's location to maximise solar gain.

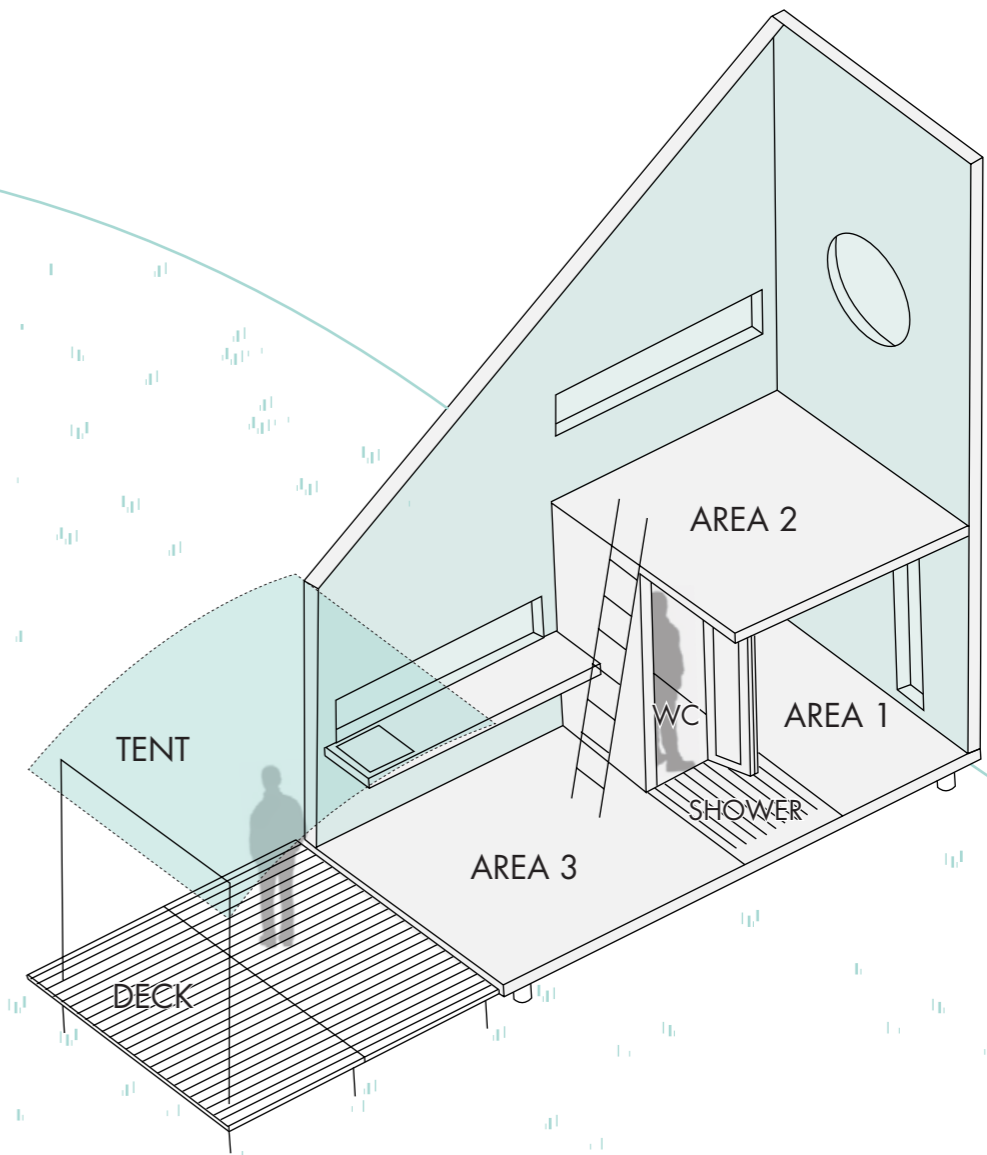

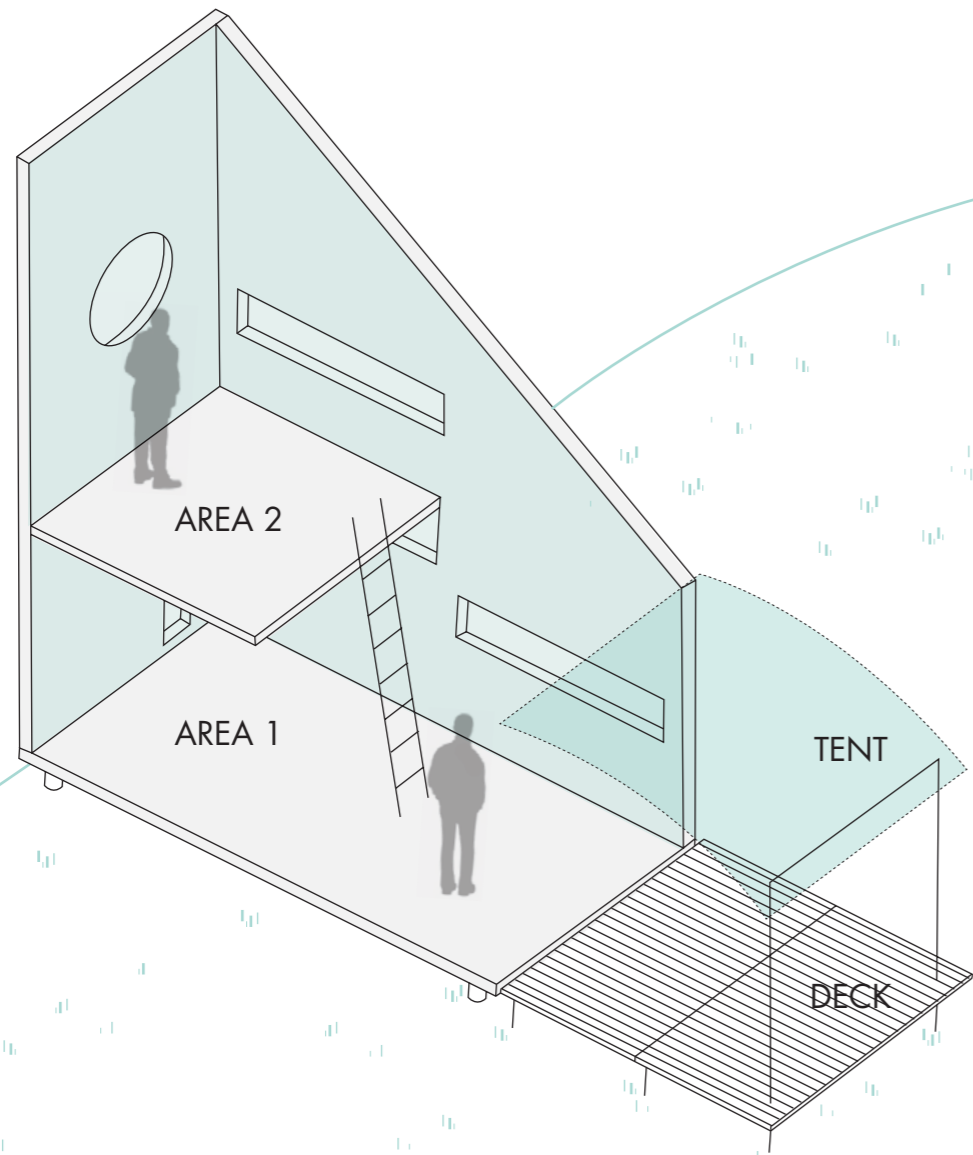

Awards + Press

POD-Idlala has been awarded the Gauteng Institute for Architecture Award 2015. currently nominated for the South African Institute of Architecture Awards of Merit, and the Afrisam Award for Sustainable Architecture. press coverage in: VISI, House and Leisure, Inhabitat and many more.
