Spéirling

Swirling vortices, spiralling chaos in the air, an irresistible pressure that cannot be seen, only felt...
Spéirling, the thunderstorm, approaches.

The brainchild of one of Britain's most successful businessmen and prolific inventors, Sir David McMurtry, the McMurtry Spéirling is an experimental pure electric concept vehicle from McMurtry Automotive. The first-of-its-kind, the Spéirling – meaning thunderstorm in Irish, the language of Sir David's roots – is a British invented, engineered and built 'no rules' track car.

McMURTRY

Spiriting

SMALLER . FASTER . FURTHER

The Spéirling invokes its namesake through the ground-breaking downforce-on-demand system that fuses the car to the track. The driver, in the eye of the storm, is in ultimate control, playing at the edges of the laws of physics and far beyond the boundaries of conventional aerodynamic performance.
