# IAA Transportation 2022: Volkswagen Commercial Vehicles and superstructure manufacturers showing more than 30 new models

- Game changer: the first ID. Buzz paramedic's car now electrifying the emergency vehicle segment
- Lots of space: Multivan launching as a new taxi version with efficient turbo-diesel engine and up to seven seats
- Workshop vehicles trending: superstructure manufacturer shows Crafter for the first time with a mobile e-bike workshop

Volkswagen Commercial Vehicles (VWCV) will be present at IAA Transportation 2022 with a great multiplicity of new models. In parallel with the globally electrifying ID. Buzz and completely new pick-up Amarok, there are interesting special vehicles from superstructure manufacturers with which clever solutions are being shown in practically all categories and areas. These include highlights such as the first paramedic's vehicle based on the ID. Buzz. Also making their debuts are innovative vehicle concepts such as the new Multivan as a taxi version and all sorts of different kinds of superstructure for the successful Crafter model.

The ID. Buzz as paramedic's car

Volkswagen Commercial Vehicles and superstructure manufacturers will be showing more than 30 models at IAA in hall 12 and outside. Several of them are new special versions of the ID. Buzz, which even before its launch is already in high demand; all of them are on show for the first time anywhere in the world. One example is the ID. Buzz paramedic's car from German superstructure manufacturer Bösenberg. Electric motoring has thus ar-

rived in the emergency vehicle sector too. There is also a complete redesign being shown of a second Bulli: the 2021 Multivan. It is now being presented in Hannover as a large taxi that can be ordered direct from the factory. Further new Multivan products include a vehicle from Dutch superstructure manufacturer Snoeks, which cleverly combines the transport of passengers and goods.

The Crafter is in engineering terms one of the most modern vans of its class. At IAA Transportation 2022 a wide variety of superstructure manufacturers are showing new developments for this product line. The spectrum ranges from pick-up, via well-thought-out courier vehicles, all the way to an MPV suitable for off-road driving. Also represented in large numbers this year at IAA are new workshop superstructures. One

highlight of this trend: the mobile e-bike workshop from German superstructure manufacturer Kögel/Flexmo, who have thought of everything, right through to fire protection. Likewise on show in Hannover are the VWCV Caddy and T6.1 product lines, as well as the company's camper vans.

For the media IAA Transportation 2022 begins on 19. September with the first press day. From 20. to 25. September the trade show doors in Hannover are open to all visitors.

## Volkswagen Commercial Vehicles

We Transport Success, Freedom and Future

As a leading manufacturer of light commercial vehicles, the Volkswagen Commercial Vehicles brand (VWCV) is reshaping the transportation of goods, services and people in a fundamental and lasting way. Our vehicles transport construction workers, families and adventurers, bread rolls, parcels and surfboards. Every day they help countless people all over the world to do a good job, they operate as mobile workshops and they bring paramedics and police personnel to wherever they are needed. At our sites in Hanover (D), Poznań (PL), Wrześnią (PL) and Pacheco (ARG), around 24,000 employees produce the Transporter, the new Multivan, Caddy, Crafter and Amarok model lines, and since May 2022 the ID. Buzz – the fully electric version of our iconic Bulli. Within the Volkswagen Group, VWCV is also the lead brand for autonomous driving and for mobility offerings such as Mobility-as-a-Service and Transport-as-a-Service – areas in which we are shaping the future of mobility. In this way, the brand is transporting the society of tomorrow with all its requirements for clean, intelligent and sustainable mobility. It is this that Volkswagen Commercial Vehicles stands for with its brand promise: We transport success, freedom and future.
