Finance.

BMW Financial Services offers you a choice of car finance options to help you get behind the wheel of a new or used BMW. At every BMW Centre, you'll find a BMW Financial Services specialist who can talk you through the options we can provide. These will depend on whether you want the option to own the car at the end of the agreement or just lease it. The difference will be explained to you to help inform your decision. Once you've chosen the finance package that suits you and your budget, we'll do the rest. From paperwork and phone calls to delivery arrangements, we'll handle all the details and do everything to get you on the road as quickly and easily as possible.

* The recommended on the road price for the vehicle (OTR price) includes delivery, BMW Emergency Service, number plates, first registration fee, vehicle excise duty and 20% VAT. The OTR price excludes any selected third-party offers (please see below).

^[2] Third-party offers are for optional products that you purchase directly from third party suppliers. Any selected third party offers are not included in the recommended on the road price for the vehicle or in BMW Financial Services finance offers.

All of the content has been put together with the greatest possible care. Despite this, BMW (UK) Ltd cannot be held liable for the information and prices contained being free of errors, correct, and accurate. No guarantee can be provided nor liability accepted.

Certain optional equipment may lead to an increase in lead time, please speak to your local BMW Centre for more information.

Along with some other manufacturers and industries, we have had to make adjustments to our production programme to take into account the worldwide limited availability of semiconductor components. This means there are some production restrictions in place that may impact delivery dates and the availability of certain equipment. BMW retailers across the UK are best placed to provide updates on approximate lead times for new car orders. To search for new BMWs that are available now and ready for you to drive away without the wait, please visit our [New Car Locator](#)

The CO2 figures shown have been determined according to the WLTP test. WLTP has been used as the applicable CO2 figure from 1 April 2020 for first year vehicle tax (VED) and from 6 April 2020 for company car tax (BIK). The CO2 figures were previously based on the NEDC equivalent. Figures shown are for comparability purposes. Only compare fuel consumption, CO2 and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load. For plug-in hybrid vehicles these figures were obtained using a combination of battery power and fuel, for battery electric vehicles after the battery had been fully charged. Plug-in hybrid and battery electric vehicles require mains electricity for charging. More information on the WLTP test procedure can be found here: <https://www.bmw.co.uk/en/topics/discover/efficientdynamics/bmw-emissions.html>

A guide on fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge. For further information you can also visit: <https://www.gov.uk/co2-and-vehicle-tax-tools>

These figures are for the basic model with the transmission offered in the basic version. They are determined using the prescribed measuring methods (Directive 80 / 1268 / EEC in its current version). They do not relate to any one particular vehicle, nor are they part of any offer made, rather they are solely for the purpose of comparing different kinds of vehicle.
